

## How the Snap Attack Compares to the Competition

FEATURE	SNAP ATTACK	COMPETITIVE UNITS
THROWING DISTANCE	5 to 100 yards	5 to 80 yards
CHANGING FROM RIGHT TO LEFT HANDED SPIRALS (AND BACK)	Spring loaded pin instantly locates precise position for exact angle need (labeled) for right or left handed spirals and kick-offs.	No settings or markings make adjustment random and difficult to find or repeat.
PORTABILITY	Two solid wide transporting wheels are always in place ready to roll.	Must attach caddy wheels to move unit on and off field.
WHEELS	Solid, broad-surface football wheels.	Air pressure tire requires constant attention.
BALL CRADLE	Holds ball in position for both right and left handed spirals and end-over-end. No tools or change of cradle required.	Requires removing spiral slide for end-over end slide. Tools required.
SPEED CONTROL	Controls are visible and safely accessible when machine is in operation.	Controls are difficult to see and dangerous to access under spinning wheels.
SAFETY	Wheels are protected by guards.	Exposed high-speed spinning wheels not protected.
HEIGHT POSITION CHANGING (FROM PASSING TO SNAPPING)	You can change from passing stand to snapping position in seconds. No tools or legs required.	Special legs required (must purchase separately.)
SNAPPING POSITION	Realistic release point low to the ground.	Legs lift release point off of ground.
ACCURACY	Exceptional-solid wheels assure repeatability.	Varied-reliant upon air pressure.
POWER	Two direct motors-no power loss from complicated flexible shaft.	One motor with flexible shaft.
USE ON CARTS	Universal cart post clamp available to attach the Snap Attack to any cart.	Can attach to any cart.
REMOTE CONTROL	Yes	No
USE WITH GENERATOR	Yes	Yes
LOCATING PIN	Three precise positions provide realistic spin (right, left, end-over-end).	None

"I've been a head football coach for over 50 years and I've seen a lot of major changes in the game. As for training equipment, Snap Attack is the best change to come along."

CHRIS PAPPAS, MONTEREY PENINSULA COLLEGE & EXECUTIVE DIRECTOR CALIFORNIA COMMUNITY COLLEGES FOOTBALL COACHES ASSOCIATION

## Football Accessories

## Remote Control Accessory

With the remote, the coach can control the tempo of the practice. He can call for the ball any time from any location on the field.

- Three positions: instant, 5 and 10 second delays
- Instant position provides on-command ball delivery with remote
- 5 and 10 second delay switch allows punter or extra-point holder and kicker to load machine, then get into position to receive ball. Machine will snap ball automatically with or without the use of the remote.
- Punter, kicker or holder can work alone with live snaps
- Coach can call for the snap in shotgun or pistol formation signal drills

**Universal Clamp for Carts** Will attach the Snap Attack to any size round or square cart post up to 4". Clamp allows for instant removal of the Snap Attack off of cart for use in snapping.

**Machine Cover** Lightweight weatherproof vinyl cover will protect the Snap Attack during outside storage.

Sports Attack also makes quality professional baseball, softball, tennis & volleyball training equipment.

SNAP ATTACK FOOTBALL MACHINE

## Machine on Passing Stand

**Locating Pin**  
Allows you to precisely locate one of three throwing head positions

**Universal Ball Feed Cradle**  
Single cradle holds ball in either spiral or end-over-end positions

**Trajectory Handle**  
Pivots throwing head instantly in any direction

**Transporting Wheels**  
Large wheels make rolling machine easy. It is extremely portable!

**Pass & Kick Elevation Control**  
Locks elevation for precise repetition

**Passing Stand**  
Elevates machine to throw passes, punts, and kick-offs

Lever Clamp and Locating Pin combine to make changing from left-hand to right-hand spirals and from spirals to kick-off, easy and quick.

**No tools required!**

## Pass, Punt and Kick-off Throwing Wheel Position Changes

Pass, Punt and Kick

**Right-Handed Spiral**  
For right-handed passes or punts

**Left-Handed Spiral**  
For left-handed passes or punts

**Kick-off**  
For end-over-ends

## Unique Features

- Universal cradle positions the ball for either passing, punting, snapping or kick-offs. (No second cradle required for kick-off.)
- Loosen lever clamp half turn, pull locating pin back, and rotate throwing head to one of three exact positions to determine right or left pass/punt or end-over end. Locating pin and holes instantly eliminate trial and error. Handles safely facilitate tilting of wheels to locate and lock throwing head into desired position.
- With a quick turn of the dial, you can throw or snap balls at any speed or to any distance.
- Two high-powered motors provide instant recovery, allowing rapid repetition and combination of drills. No waiting for wheels to come back up to speed.
- Passing Stand allows throwing head to pivot instantly in any direction, accurately throwing passes, punts and kick-offs to any location on the field. Operators can lead receivers or spot punts or kick-offs precisely for both returns and coverage. Elevation changes are quick and easy. Machine can also be locked in for precise repetition.
- In lowered position at ground level at realistic angles, machine snaps ball to any depth in shotgun and pistol formations, extra points and punts.
- Solid guarded wheels are specially-designed for minimal wear and last the life of the machine with no need for pressure changes.
- Forces quarterbacks to focus on catching the ball in snapping position for shotgun and pistol signal drills helping to eliminate fumbles in game conditions.
- For extra point practice, it creates realistic timing as holder must focus on catching snap before placing ball. Also improves timing of kicker as he must time with snapped ball and holder.
- Provides opportunity for holders and punters to practice against bad snaps.
- Unit quickly moves on and off field, just tilt it, unsocket legs, and easily roll it on two transporting wheels.
- Controller is accessible, visible and safely away from throwing wheels
- Cast aluminum throwing wheel guards protect players, coaches, fingers and hands during operation.
- Accessory remote automatic feed allows coach to control tempo of practice. Ball is snapped, passed or kicked on coach's command. Remote can be changed back to hand-feed in seconds.
- No assembly is required, unit arrives fully assembled and ready for your immediate use.

Remote Control

## Machine in Snapping Position

**Lifting Handles**  
Makes it easy to set up machine

**Speed Control Dial**  
Controls ball velocity and distance

**Elevation Control**  
Elevates snaps for required angle and distance

**Ball Feed Handle**  
Allows you to safely slide ball into throwing wheels

### Extremely Portable

Machine is easily rolled on and off field in either snapping or passing/punting positions.

**“What a difference! No air pressure to worry about and no hassling with additional parts, what a time saver! I like the simplicity of this machine, there are no delays.”**

**KEVIN PURVIS, EQUIPMENT MANGER, UNIVERSITY OF GEORGIA**

## Outstanding Performance

	SNAP ATTACK
SPEED	70+ MPH
DISTANCE	Passes and punts—100 yards, Kick-offs—70+ yards, Snaps—tight spirals from 5 yards to 15 yards
BALL RELEASE POINT	Passes—5'. Snaps—ground level
ACCURACY	Wide solid football throwing wheels provide precise accuracy
RECOVERY TIME	5 seconds, with two motors it is almost instant
PORTABILITY	Quickly rolls on and off the field
VERSATILITY	Can do it all with no additional parts
EFFICIENCY	Instantly locate wheel tilt for all realistic ball delivery options, no guessing, no tools, no trials
MAINTENANCE	Solid football wheels—no air pressure adjustment ever needed

## Exceptional Quality

- Aluminum casting is light, strong, and weather-proof.
- Steel-plated frame for strength and weather-resistance.
- Solid polyurethane football wheels provide tight spiral, long distance and accuracy and minimize marking and wearing of balls. No air pressure required.
- Two extra-wide solid transporting wheels make moving machine on and off field easy.
- Extra wide tripod base insures real stability and safety.
- Two powerful variable speed motors drive two indestructible football throwing wheels.
- Maintenance free! All bearings are sealed and good for life of motor.
