

SOFTBALL

PROGRAMMABLE PITCHING MACHINE

Realistic

Vision Motion Timing

eHACK
ATTACK
ELECTRONIC

The Softball eHack Attack is Sports Attack's programmable pitching machine. In seconds you can set any change in speed, location and pitch type to deliver any fastball, rise, drop, and right- or left-hand screwballs.

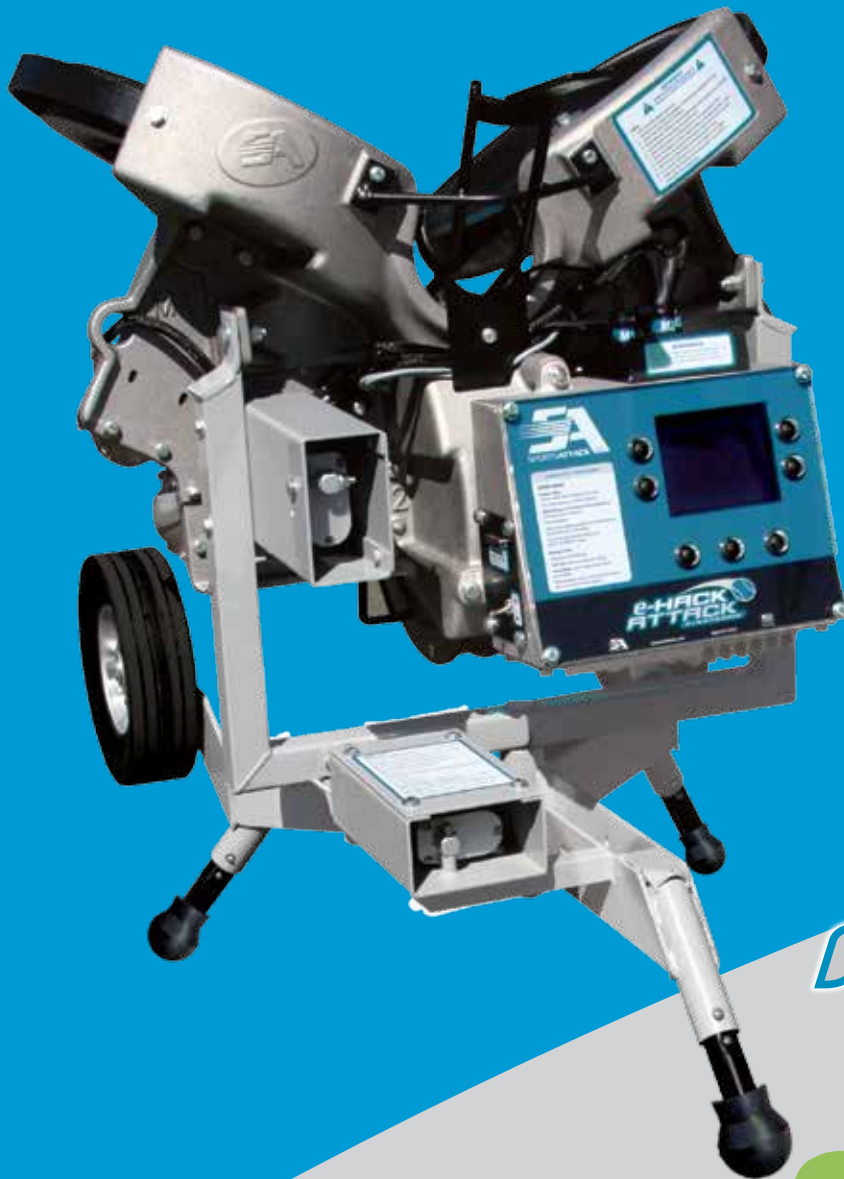

Pitches can be set in any sequence, weighted or random, to allow a hitter to work on weaknesses or to prepare for an upcoming pitcher. Create up to ten (10) left- or right-handed pitch sequences. Each pitch sequence can have up to ten (10) pitches. Each pitch can have up to ten (10) balls. That's up to 2000 pitches!

With the complete vision and timing of the Hack Attack, this unit will provide the most realistic batting practice possible...it will truly be "just like a live pitcher"

The eHack Attack can be hand fed or can be used with our 75 ball Team Feeder or Solo Feeder.

- The eHack Attack pitching machine quickly moves on and off the field by just tilting it, un-socketing the legs and easily rolling it on two heavy-duty transporting wheels (not the throwing wheels).
- The front wheel guards insure the throwing wheels never come in contact with the ground.
- The eHack Attack pitching machine is designed for use with regulation leather softballs, dimpled practice balls, Wiffle® balls and all softer practice balls. (Not synthetic leather balls as they wear quickly and will leave a residue on the wheel.).
- No assembly is required; the eHack Attack arrives fully assembled and ready for your immediate use.
- The eHack Attack softball pitching machine is heavy enough to absorb recoil, ensuring accuracy, yet portable and easily moved by one person.
- The extra wide tripod base insures real stability and safety on pitching mounds or softball playing surfaces.

eHACK ATTACK SOFTBALL PITCHING MACHINE

Set-up and usage is easy:

- Easy LCD menu with protected screen cover
- Alignment set-up process prior to running sequence ensures accuracy
- Programming provides the ability to establish 20 full sequences of 10 pitches each for a total of 2000 pitches
- Full sequences or each individual pitch selection within the sequence can quickly be repeated up to 10 times
- Machine automatically changes pitch location as programmed
- Save and time out capabilities provide the ability to switch hitters or coach
- In manual mode the eHack can be used on the mound in an inter-squad game with pitches that are all strikes of different types at the command of the coach. A real fast-paced experience for both hitters and fielders.

Outstanding Performance

eHACK ATTACK	
SPEED	80+ MPH
DISTANCE	43 feet
VISION	Complete ball vision provides a realistic sense of timing
ACCURACY	The ball is gripped in three locations, providing tremendous control and accuracy
EFFICIENCY	All programmable
FUNGO	N/A
PORTABILITY	Quickly rolls on and off the field
RECOVERY TIME	8 seconds, because machine may be changing pitches between pitches

Features of Distinction

eHACK ATTACK	
LEVEL OF PLAY	High school, college, professional, and commercial sports facilities
PITCHES	PROGRAMMABLE Fastballs, fastball, rise, drop, and right- or left-hand screwballs.
WEIGHT	185 lbs.
TRANSPORTABILITY	Fits into any SUV or full size car, fits through standard doorway
AUTOMATIC FEEDERS	Can use either Solo Feeder (8 ball) or the Team Feeder (75 ball)
POWER SUPPLY	110 V only
BALL TYPES	All types, including leather (no synthetics)
BALL SIZES	Softball only (baseball unit available)
